# CREATIVE CHALLENGE TO PRODUCT DESIGNERS & ENGINEERS FROM...

REEVAIR\*

**Reevair** is the microporous film that has the unusual property of keeping water out — yet allows the flow of gas, air or vapor. It may be likened to the tiny pores of your skin — waterproof, breathable, comfortable.

These properties applied to end uses are limited only by your imagination. Ideas that range from filtration and shoe linings to baby pants! Just a few are illustrated at the right.

Write for your free booklet that details the technical data of **Reevair** as it applies to many fabric constructions. Find out for yourself how **Reevair** can be applied to **your** specific product areas!

### Are bronze castings "good enough" for your worm gear applications?

### THEY ARE IF:

- Cost is no object and fluctuating tin prices are not troublesome.
- · Service failures won't hurt your company's reputation.
- · You have some economical way to salvage manufacturing rejects.
- · Your customers never exceed your "service factors" and "rated loads"
- · Your competitors haven't already switched to

MUELLER DYNALLOY FORGED BRONZE GEAR BLANKS

Speed reducer manufacturers can't afford to take chances with the materials that go into their products. Chances are you can't either. If we're right, call or write Gear Blank Division Manager Dick Kliemann for full information on DYNALLOY Forged Bronze Gear Blanks. His phone number is (313) 985-5111.

UELLER BRASS CO. PORT HURON, MICHIGAN 48061 GEAR BLANK DIVISION (stock and custom-engineered DYNALLOY Forged Bronze Gear Blanks)

### NEW INVISIBLE HINGES

### **General Purpose Hinge Creates Flush Surfaces**

These hinges are completely hidden from view when door, lid or hood is closed. Makes possible flush, absolutely smooth surfaces that greatly enhance appearance and safety. Tapered body sections are precision castings of a special zinc base alloy having a tensile strength

of 47,000 pounds per square inch. Operates in a 180 degree arc which permits full opening. Laminated link construction reduces friction and permits hinges to operate freely and smoothly. Hinges are reversible and may be used right or left hand. Available for wood or metal application in a wide variety of sizes.

SOSS MANUFACTURING COMPANY, Dept. EDN-1, P. O. Box 38, Harper Station, Detroit 13, Michigan. Circle Service No. 141

PREFERRED BY MORE DESIGN **ENGINEERS IN** THE OEM.

Issue	Date	Page
Structural Vibration Testing	Oct. 27	140
Surface Area of a Cone	Feb. 3	102
Testing, Vibration, Structural	Oct. 27	140
Thermosetting Compounds, Design	Luna 0	80
Properties for	June 9	00

Characteristics for	Nov. 10	100
Wedge Cut from a Cone	Oct. 13	87
Wedges, Spherical	<b>Sept. 29</b>	146
Weights of Honeycomb Panel, Estimating	Feb. 3	98

"How's that for easy reference?"

### All turret cases are not alike...

weld process, Mastergauge enduring accuracy, "easy read" dials, twin tip pointers, blow out plugs-and an exclusive recalibrator that adjusts by correcting the basic error. Not by merely moving the pointer. Finish on the high impact phenol case is better, too. Smooth, no-glare satin black for smooth, easy painting. For complete information, ask your man from Marsh or contact us direct.

Marsh Instrument Co., Dept. 38125, Skokie, III.

Circle Service No. 122

LIGHT FORCE

Specifications:

Sizes 4-1/2" and 6". For Mastergauges,

Master Test Gauges, Hydraulic Quality Gauges

and dial thermometers

Bottom or back outlet. Blow out plug is standard

in Mastergauges. Available in others

## Cherry Switch

SUBMINIATURE E61-60K Roller Type

- Operating Force 9 grams Max.
- 5 amp, 125-250 V AC

The complete snap-action switch line!
